

Amendments to the Drawings

Upon review of the application file in advance of submitting formal drawings, an error was noted in Figure 3 of the informal drawings as filed, namely, the presence of an extraneous indicator numeral 40. Accordingly, the enclosed formal drawings present a change to Figure 3 in which the indicator numeral 40 is removed. The accompanying copy of Figure 3 shows the correction in red. The specification contains no reference to an indicator numeral 40 and the change thus conforms Figure 3 to the specification.

The formal drawings make no other substantive changes to the informal drawings originally filed, but place them in compliance with Rule 84 and in better form for publication than the informal drawings.

Attachments:

Formal drawings, eight sheets

One sheet annotated (in red), showing change

Respectfully submitted,

A handwritten signature in black ink, appearing to read "V. E. Libert", written over a horizontal line.
